

## What is OpticalTel's **CLOUD PBX**?

A cloud-based PBX uses the Internet to deliver all features of an enterprise on-premise PBX without the hardware, set up fees, and maintenance costs.

**OpticalTel** CLOUD PBX is the solution to the on-premise PBX, which is simply expensive, difficult to maintain, and not practical. With our Cloud PBX initial setup costs go away, as well as fees to hire a vendor to perform simple Move, Add and Changes.

On-premise PBX's also limit scalability and mobility. With our CLOUD PBX, the system is future-proofed, the amount of users and trunks are virtually limitless, and you are not confined to the premise. You can seamlessly integrate multiple locations, mobile phones and tablets, have remote office workers, and take your office with you.

Learn what a **CLOUD PBX** can do for your business and how we provide the phone system **FREE**.

**Tired of your outdated legacy phone system?** Stop wasting time and money and order OpticalTel's CLOUD PBX with (UC) Unified Communications for less than \$30.00 per month per user and get each of your employees a free IP Phone and unlimited calling to the continental US and Canada.

For a limited time, you can also get free installation and free activation for each of your sites, as well as a free router.
